Delegate Programme on sustainable solutions for Industrial Process Heat

The UNIDO ITPO Germany Delegate Programme is targeted at industry representatives / companies from selected African countries, who have a demonstrated interest and concrete investment projects to improve their energy efficiency by using renewable energy sources for generating industrial process heat. The focus of the programme will be on Solar Heat in Industrial Processes (SHIP) and Concentrated Solar Power (CSP) in particular. Participating companies will participate and play an active role in The Arc Cleantech Festival, with additional targeted visits on three days to project sites, research institutions and technology providers in Europe with focus on the application of these technology solutions.

Company eligibility criteria:

- Companies from industries with substantial use of low- and mid-temperature process heat (80-400°C), and with a need and potential to implement solutions for the use of direct process heat and steam generated from renewable energy sources.
