Project Name (English / French as submitted)
Hydro-Agricultural Infrastructure with Water Control
CRÉATION ET RÉHABILITATION DES AMÉNAGEMENTS HYDRO-AGRICOLES AVEC MAÎTRISE DE L'EAU
Agricultural Mechanization Programme
PROJET DE DEVELOPPEMENT DE LA MECANISATION AGRICOLE
Modern Abattoirs and Veterinary Public Health Institute
PROJET DE CONSTRUCTION D'INFRASTRUCTURES D'ABATTAGE, DE COMMERCIALISATION DE BÉTAIL ET DE L'INSTITUT DE SANTÉ PUBLIQUE VÉTÉRINAIRE
Military Asset Digitalisation
PROJET DE DIGITALISATION DE LA GESTION DES ACTIFS, DE LA MAINTENANCE ET DES OPERATIONS DES FORCES ARMÉES DE CÔTE D'IVOIRE
Radio Communication Equipment Assembly Facility
CONSTRUCTION D'UNE UNITÉ DE MONTAGE D'EQUIPEMENTS DE RADIOCOMMUNICATION
Drone Assembly and Production Facility
CONSTRUCTION ET ÉQUIPEMENT D'UNE UNITÉ DE MONTAGE DE DRONES
Small-Calibre Ammunition Manufacturing Plant
CONSTRUCTION ET ÉQUIPEMENT D'UNE USINE DE FABRICATION DE MUNITIONS D'ARMES DE PETIT CALIBRE
HCCA Production Facility (Clothing, Bedding, Camping & Furniture)
CONSTRUCTION ET ÉQUIPEMENT D'UNE UNITÉ DE PRODUCTION DES HCCA (HABILLEMENT, COUCHAGE, CAMPEMENT, AMEUBLEMENT) DES FACI
Ebimpé Olympic City
CONSTRUCTION ET EXPLOITATION DE LA CITÉ OLYMPIQUE D'EBIMPE
Pharmaceutical Technopole
MISE EN PLACE DU TECHNOPOLE PHARMACEUTIQUE EN CÔTE D'IVOIRE
Automotive Engineering and Vehicle Prototype Development at INP-HB
DEVELOPPEMENT DE L'INGENIERIE AUTOMOBILE ET PRODUCTION DE PROTOTYPES DE VEHICULES A L'INPHB
Regional and University Innovation Centres with Fab Labs

CONSTRUCTION ET ÉQUIPEMENT DE DIX (10) CENTRES RÉGIONAUX ET UNIVERSITAIRES D'INNOVATION AVEC FAB LABS
Unified Service Backbone (BUS)
PROJET DE MISE EN ŒUVRE DU BACKBONE UNIFIÉ DE SERVICE (BUS)
National Broadband
Network Extension (RNHD)
PROJET D'EXTENSION DU RÉSEAU NATIONAL HAUT DÉBIT (RNHD)
City of Innovation and Culture
CONSTRUCTION DE LA CITÉ DE L'INNOVATION ET DE LA CULTURE
Sustainable Smart Cities Pilot in 10 Agglomerations
ELABORER ET METTRE EN ŒUVRE UN PROJET PILOTE 10 DE VILLES INTELLIGENTES (SMART CITY) DURABLES DANS 10 AGGLOMÉRATIONS
Fibre Optic Deployment to All Sub-Prefectures
POURSUITE DU DÉPLOIEMENT DE LA FIBRE OPTIQUE POUR L'INTERCONNECTION DE TOUTES LES SOUS PRÉFECTURES DU PAYS
Integrated Healthcare Waste Management Centre for Greater Abidjan
CONCEVOIR, FINANCER, CONSTRUIRE ET EXPLOITER UN CENTRE DE GESTION INTÉGRÉE DES DÉCHETS SANITAIRES DANS LE GRAND ABIDJAN
Twenty Controlled Landfills in Secondary Cities
CONCEVOIR, FINANCER ET CONSTRUIRE VINGT (20) DÉCHARGES CONTRÔLÉES DANS LES VILLES DE ABENGOUROU, VAVOUA, OUMÉ, SÉGUÉLA, KATIOLA, MANKONO, DANANÉ, DIMBOKRO, TOUBA, ZUÉNOULA, GRAND-LAHOU, FRESCO, GRAND-BÉRÉBY, TABOU, AGNIBILÉKROU, MAN, ODIENNÉ, TENGRÉLA, BOUNDIALI ET BOUNA
Intercommunal Waste Infrastructure for Daoukro, Bongouanou and Arrah
CONCEVOIR, FINANCER, CONSTRUIRE ET EXPLOITER 03 CENTRES DE TRANSFERT (CT) ET 01 CENTRE DE VALORISATION ET D'ENFOUISSEMENT TECHNIQUE (CVET) POUR LA GESTION INTERCOMMUNALE DES DÉCHETS DANS LES VILLES DE DAOUKRO, BONGOUANOU ET ARRAH
Intercommunal Waste Infrastructure for Yabayo, Soubré and Méagui

CONCEVOIR, FINANCER, CONSTRUIRE ET EXPLOITER 03
CENTRES DE TRANSFERT (CT) ET 01 CENTRE DE VALORISATION
ET D'ENFOUISSEMENT TECHNIQUE (CVET) POUR LA GESTION
INTERCOMMUNALE DES DÉCHETS DANS LES VILLES DE
YABAYO, SOUBRÉ ET MÉAGUI

Intercommunal Waste Infrastructure for Gagnoa, Lakota and Divo

CONCEVOIR, FINANCER, CONSTRUIRE ET EXPLOITER 06
CENTRES DE TRANSFERT (CT) ET 01 CENTRE DE VALORISATION
ET D'ENFOUISSEMENT TECHNIQUE (CVET) POUR LA GESTION
INTERCOMMUNALE DES DÉCHETS DANS LES VILLES DE
GAGNOA, LAKOTA ET DIVO

Intercommunal Waste Infrastructure for Agboville, Adzopé and Akoupé

CONCEVOIR, FINANCER, CONSTRUIRE ET EXPLOITER 04
CENTRES DE TRANSFERT (CT) ET 01 CENTRE DE VALORISATION
ET D'ENFOUISSEMENT TECHNIQUE (CVET) POUR LA GESTION
INTERCOMMUNALE DES DÉCHETS DANS LES VILLES DE
AGBOVILLE, ADZOPÉ ET AKOUPÉ

Intercommunal Waste Infrastructure for San Pedro and Sassandra

CONSTRUIRE ET EXPLOITER TROIS CENTRES DE TRANSFERT
(CT) ET UN CENTRE DE VALORISATION ET D'ENFOUISSEMENT
TECHNIQUE (CVET) POUR LA GESTION INTERCOMMUNALE DES
DÉCHETS DANS LES VILLES DE SAN PEDRO ET SASSANDRA

Intercommunal Waste Infrastructure for Daloa, Gonaté, Bonon and Bouaflé

CONCEVOIR, FINANCER, CONSTRUIRE ET EXPLOITER 06
CENTRES DE TRANSFERT (CT) ET 01 CENTRE DE VALORISATION
ET D'ENFOUISSEMENT TECHNIQUE (CVET) POUR LA GESTION
INTERCOMMUNALE DES DÉCHETS DANS LES VILLES DE DALOA,
GONATÉ, BONON ET BOUAFLE

Intercommunal Waste Infrastructure for Bloléquin, Guiglo and Duékoué

CONSTRUIRE ET EXPLOITER 03 CENTRES DE TRANSFERT (CT) ET
01 CENTRE DE VALORISATION ET D'ENFOUISSEMENT
TECHNIQUE (CVET) POUR LA GESTION INTERCOMMUNALE DES
DÉCHETS DANS LES VILLES DE BLOLÉQUIN, GUIGLO, DUÉKOUÉ

CAFAD Implementation and Agro-Forest Restoration

MISE EN ŒUVRE DES CAFAD ET RESTAURATION DES AGRO-
FORÊTS

Circular Economy Operationalisation Programme

PROGRAMME D'OPÉRATIONNALISATION DE L'ÉCONOMIE
CIRCULAIRE

Regional Bio-Larvicide Manufacturing Plant

CONSTRUIRE UNE USINE REGIONALE DE BIO-LARVICIDES EN

Industrial Production of Mini-Tractors and Agricultural Drones

PROJET DE PRODUCTION INDUSTRIELLE DE MINI TRACTEURS ET DE DRONES AGRICOLES

Project Description
Develop and rehabilitate irrigation infrastructure to improve water security, climate resilience and year-round agricultural production.
Establish mechanization centers, equipment assembly facilities and financing solutions to modernize agricultural production.
Develop modern abattoirs, livestock markets and veterinary infrastructure to strengthen the livestock value chain and food safety.
Implement an integrated digital platform to manage military assets, maintenance and logistics.
Establish a national assembly facility for military radio communication equipment.
Establish a national drone assembly and production facility for defence and future commercial applications.
Develop a domestic manufacturing facility for small-calibre ammunition.
Establish an integrated production facility for military clothing, bedding, camping equipment and furniture.
Develop an integrated sports, residential and commercial urban hub around the Ebimpé Olympic Stadium.
Create an integrated pharmaceutical production, R&D and training hub to reduce import dependence and strengthen health sovereignty.
Build a national automotive engineering and prototyping platform to support research, skills and industrial development.

Build and equip 10 regional and university innovation centres to expand access to prototyping, training and entrepreneurship support.

Activate and operationalise the national fibre backbone to securely interconnect public administrations and improve broadband service delivery.

Extend fibre-optic coverage to regional, departmental and sub-prefecture centres to expand high-speed national connectivity.

Develop an integrated innovation, entrepreneurship and cultural industries hub to position Côte d'Ivoire as a regional creative technology centre.

Implement pilot smart-city solutions across 10 agglomerations to improve urban services, inclusion and digital territorial management.

Continue fibre-optic deployment to connect all sub-prefectures and strengthen national broadband coverage.

Develop an integrated facility for safe collection, treatment and disposal of healthcare waste across Greater Abidjan.

Build controlled landfills in twenty secondary cities to improve waste disposal, urban sanitation and environmental protection.

Develop three transfer centres and one technical landfill and recovery centre for intercommunal waste management.

Create transfer and recovery infrastructure to improve solid-waste management in Yabayo, Soubré and Méagui.

Develop six transfer centres and one recovery and technical landfill centre for the Gagnoa-Lakota-Divo waste catchment.

Build four transfer centres and one recovery and technical landfill centre for Agboville, Adzopé and Akoupé.

Establish three transfer centres and one recovery and technical landfill centre serving San Pedro and Sassandra.

Develop six transfer centres and one recovery and technical landfill centre for Daloa, Gonaté, Bonon and Bouaflé.

Improve intercommunal solid-waste management in Bloléquin, Guiglo and Duékoué through modern transfer and treatment infrastructure.

Implement PPP conventions to restore degraded classified forests and develop productive agro-forestry models.

Develop circular-economy solutions for plastics, electronic waste and used tyres through private operators and recycling systems.

Build a regional bio-larvicide production plant to support malaria vector control in Côte d'Ivoire and the ECOWAS region.

Develop an integrated media city to consolidate public communication institutions and strengthen Côte d'Ivoire's media ecosystem.

Build professional audiovisual production studios to develop Côte d'Ivoire's film, television and creative-content industry.

Develop dedicated truck parks and a digital call-up system to reduce port congestion, improve traffic flows and strengthen logistics safety.

Develop a major logistics platform in Bouaké to support inland trade, freight consolidation and regional supply-chain services.

Create a national lagoon and maritime transport company to expand passenger and freight services across coastal and lagoon networks.

Develop a national maritime fleet to reduce dependence on foreign carriers and strengthen domestic maritime logistics capacity.

Restore lagoon navigability and environmental quality through dredging, pollution reduction and improved waterway management.

Introduce airship-based freight transport to serve remote areas and provide an alternative logistics solution for heavy cargo.

Upgrade Bouaké and Yamoussoukro airports to improve safety, compliance and regional air-connectivity capacity.

Build an air cargo hub in Bouaké to support freight handling, regional trade and logistics services.

Develop a dedicated mineral terminal at San Pedro to support mining exports and expand port handling capacity.

Develop a multipurpose commercial terminal to expand San Pedro's cargo-handling capacity and improve port competitiveness.

Introduce lagoon barge freight services to move cargo by water and reduce road congestion around Abidjan.

Construct a 640 km high-speed rail corridor linking Abidjan, Bouaké, Korhogo and Ferkessédougou.

Build an 872 km rail corridor from San Pedro to Odienné and the Mali border to strengthen export and regional trade links.

Construct a 188 km cross-border rail link to improve connectivity between northern Côte d'Ivoire and Mali.

Rehabilitate the existing Abidjan-Ouagadougou-Kaya rail axis to restore freight and passenger performance.

Continue construction of Abidjan Metro Line 1 to deliver mass urban transit and reduce congestion in Greater Abidjan.

Build a modern international bus terminal in Bouaké to strengthen regional passenger transport and improve travel conditions.

Develop a modern international bus terminal in Abidjan to replace congested facilities and improve intercity and cross-border transport.

Rehabilitate the Pyramide building in Plateau to restore public office capacity and reduce long-term rental costs.

Rehabilitate the BICICI building to provide modern administrative office space and reduce the State's reliance on private leases.

Modernise Tour E of the Abidjan administrative city to restore safety, functionality and compliance with high-rise public-building standards.

Create a construction and building-materials free zone to attract manufacturers, localise production and support housing and infrastructure delivery.

Deliver 25,000 affordable housing units across Abidjan and regional cities through serviced sites and private developer participation.

Construct five modern administrative towers in Abidjan Plateau to consolidate public services and reduce recurring lease costs.

Develop administrative, housing and basic infrastructure to enable the effective transfer of Côte d'Ivoire's political capital to Yamoussoukro.

Develop new smart cities in Greater Abidjan to absorb urban growth, improve living conditions and promote climate-resilient urban planning.

Develop a 300 ha industrial zone in Adzopé to attract processing investors and strengthen agro-industrial value chains in the Mé region.

Develop a compact industrial zone in Assouba to support SMEs, agro-processing and fisheries-linked manufacturing near Grand-Bassam.

Develop a 540 ha industrial zone in San-Pédro to support agro-industrial, mining and port-linked manufacturing activities.

Develop a 500 ha industrial zone in Yamoussoukro to support balanced territorial industrialisation and new productive investment.

Develop a 329 ha industrial zone in Bonoua to support manufacturing, agro-processing and industrial activity near the Abidjan corridor.

Develop a 150 ha industrial zone in Bouaké to strengthen the central region's manufacturing base and private investment capacity.

Develop a free zone across Île Boulay and Songon-Jacqueville to attract export-oriented industry, logistics and private investment.

Develop an 80 MW solar plant with 33 MWh battery storage to expand renewable generation and improve supply reliability.

Develop a 96 MW solar plant with 120 MWh storage to increase renewable energy capacity and strengthen grid flexibility.

Develop the Sakassou critical minerals project to support exploration, extraction and value creation in lithium, tantalum and rare earths.

Install a 200 MWh battery storage system to strengthen grid flexibility, support renewable integration and improve supply reliability.

Install a 200 MWh battery storage system to strengthen grid flexibility, support renewable integration and improve supply reliability.

Install a 200 MWh battery storage system to strengthen grid flexibility, support renewable integration and improve supply reliability.

Install a 200 MWh battery storage system to strengthen grid flexibility, support renewable integration and improve supply reliability.

Install a 200 MWh battery storage system to strengthen grid flexibility, support renewable integration and improve supply reliability.

Install a 200 MWh battery storage system to strengthen grid flexibility, support renewable integration and improve supply reliability.

Develop a 32 MW solar plant with 45 MWh battery storage to expand renewable supply and improve local grid stability.

Develop a 32 MW solar plant with 45 MWh battery storage to diversify the power mix and leverage existing grid infrastructure.

Develop an 80 MW solar plant with battery storage to expand renewable generation and improve supply in the Vallée du Bandama region.

Build a 100 MWc solar plant with 100 MWh battery storage to support northern power supply and renewable integration.

Develop a 120 MWc solar plant with 120 MWh storage to reinforce renewable capacity and grid stability in northern Côte d'Ivoire.

Construct and commission a 140 MW hydropower plant to strengthen renewable baseload generation and diversify the electricity system.

Develop a 450 MW combined-cycle plant to meet rising electricity demand and provide reliable dispatchable power.

Build a 30,000 m³ petroleum-products depot in Odienné to improve supply security for the north-west and regional markets.

Construct a new lagoon jetty at Vridi AKO to increase petroleum-product reception capacity and reduce logistics bottlenecks.

Develop a natural gas pipeline from Abidjan to Ferkessédougou to supply northern industry and power generation.

Develop a petroleum-products pipeline from Abidjan to Ferkessédougou to reduce road-transport dependence and improve supply efficiency.

Install a floating LNG storage and regasification terminal to secure additional gas supply for power generation and industry.

Build 50,000 MT butane storage spheres at Vridi AKO to strengthen LPG security of supply and support cleaner household energy.

Build a new continuous catalytic reforming unit to increase high-octane fuel production and improve refinery efficiency.

Develop an integrated western mining corridor to unlock critical minerals, processing infrastructure and regional economic activity.

Develop a major integrated tourism and entertainment complex in Yamoussoukro, combining leisure, hospitality and attraction facilities to create a regional destination.

Upgrade public beaches with equipment, safety and visitor services to strengthen domestic and regional coastal tourism.

Develop integrated coastal tourism assets across Niani, Godé, Sassandra and Grand-Béréby, combining hotels, cultural excursions and nature-based experiences.

Build an integrated leisure and attractions park in Abidjan and Grand-Bassam with entertainment, hospitality, commercial and cultural facilities.

Develop 3- to 5-star eco-hotels across priority tourism sites, combining sustainable accommodation, local value chains and destination branding.

Develop priority coastal sites in Assinie, Jacqueville and San Pedro as integrated beach destinations for national, regional and international visitors.

Establish a structured digital automotive maintenance cluster to formalise garages, upgrade skills and support new vehicle technologies.

Build eight specialised border depots to improve storage, reduce losses and strengthen sanitary controls for cross-border trade.

Build integrated cultural centres in five regions to decentralise cultural infrastructure, support artists and expand creative economy opportunities.

Develop livestock, fisheries and aquaculture infrastructure, nutrition systems, market access and veterinary services to strengthen food security in northern Côte d'Ivoire.

Scale up short-cycle livestock production, including poultry, pork and emerging species, through infrastructure, inputs, training and private value-chain participation.

Develop ruminant value chains, including feed systems, dairy, meat production, animal health and processing infrastructure, to reduce import dependence.

Clean and valorise lagoon sediments and waste by converting them into energy and industrial inputs while restoring environmental quality.

Develop 10,000 hectares of industrial flower production and processing infrastructure to position Côte d'Ivoire as a regional horticulture export hub.

Establish 40,000 hectares of industrial rice, tomato, soybean and maize production with processing capacity to strengthen food self-sufficiency.
Develop industrial facilities to produce urea, energy and helium from discovered gas resources, supporting agriculture, petrochemicals and energy security.
Build a recycled-textile production platform that collects, sorts and transforms used textiles into new fabrics for export markets.
Develop biological dye production from local crops to serve artisanal textile markets and meet demand for environmentally responsible inputs.
Valorise rubberwood through furniture, pallets and biochar production, creating new income streams from underutilised hevea resources.
Transform oil-palm empty fruit bunches into paper products, supporting circular economy development and reducing pressure on forest resources.
Develop a controlled-temperature pharmaceutical logistics platform to connect global distributors, health supply chains and multimodal transport infrastructure.
Develop a world-class smart private industrial park between PK 103 and PK 120 to attract manufacturers, retailers and logistics investors.
Develop a regional private data centre hub serving global operators, digital backup needs and Côte d'Ivoire's digital infrastructure ambitions.
Create an airport logistics hub and fresh produce centre to position Yamoussoukro as a regional cold-chain and horticulture export platform.
Establish industrial assembly capacity for mini-tractors and agricultural drones to accelerate mechanisation and improve farm productivity.

Strategic Alignment	Strategic Assessment
Food Security • Climate Resilience • Strategic Infrastructure	Well suited for blended financing with significant long-term development impact.
Agricultural Transformation • Private Sector Development • Food Security	Strong opportunity to mobilise private capital through leasing and equipment finance.
Food Security • Industrial Development • Public Health	Regional infrastructure project with attractive PPP operating potential.
Digital Transformation • Strategic Infrastructure	Technology modernization project with measurable operational benefits.
Industrial Development • Technology Transfer	Good industrial partnership opportunity.
Advanced Manufacturing • Technology Transfer	High-value technology investment with industrial spillovers.
Industrial Development • Manufacturing	Strategic manufacturing investment supporting domestic production.
Industrial Development • Manufacturing • Private Sector Development	Large-scale manufacturing opportunity with local supplier potential.
Urban Development • Sports Infrastructure • Private Sector Development	Large PPP opportunity with real estate, hospitality and sports infrastructure components.
Health Sovereignty • Industrial Development • Innovation	Strategic industrial health platform with strong potential for private pharmaceutical investors.
Industrial Development • Skills • Innovation	Useful platform for technology transfer and future automotive cluster development.

Digital Innovation • Skills • Entrepreneurship	Compact innovation infrastructure project with strong youth and SME development benefits.
Digital Infrastructure • E-Government • Connectivity	Core digital infrastructure project that can improve public service delivery and network utilisation.
Digital Infrastructure • Connectivity • Territorial Inclusion	Strong national connectivity project with clear public and private sector use cases.
Innovation • Creative Industries • Entrepreneurship	Large ecosystem project with strong private partnership and investment attraction potential.
Smart Cities • Digital Transformation • Urban Services	Distinct pilot project focused on urban digital services and smart-city deployment.
Digital Infrastructure • Connectivity • Territorial Inclusion	Longer-horizon fibre deployment programme complementing the broader RNHD expansion.
Public Health • Waste Management • Environmental Protection	Essential PPP for specialized healthcare-waste treatment with clear public-health and environmental benefits.
Urban Sanitation • Municipal Infrastructure • Environmental Protection	Scalable municipal waste infrastructure with strong environmental and public-health returns.
Waste Management • Circular Economy • Municipal Infrastructure	Suitable PPP if service payments and intercommunal governance are clearly structured.

Waste Management • Circular Economy • Municipal Infrastructure	Targeted intercommunal PPP with direct sanitation and environmental benefits.
Waste Management • Circular Economy • Municipal Infrastructure	Bankability will depend on reliable municipal revenues and private operator appetite.
Waste Management • Circular Economy • Municipal Infrastructure	Compact PPP project with clear operating scope and local environmental benefits.
Waste Management • Port-City Infrastructure • Environmental Protection	Good sanitation PPP for a strategic coastal and logistics corridor.
Waste Management • Circular Economy • Municipal Infrastructure	Largest intercommunal waste PPP in this batch, with strong regional sanitation relevance.
Waste Management • Municipal Infrastructure • Environmental Protection	Shorter implementation horizon with strong local environmental and public-health benefits.
Forest Restoration • Climate Resilience • Private Sector Development	High strategic environmental programme with measurable climate and private forestry participation benefits.
Circular Economy • Waste Valorisation • Green Industry	Strong green-industry platform with potential to mobilise specialised operators and climate finance.
Health Security • Regional Integration • Industrial Development	Regional health-manufacturing opportunity with export potential and public-health relevance.

Creative Economy • Media Infrastructure • Institutional Modernisation	Large media infrastructure investment with potential to attract private media operators.
Creative Industries • Audiovisual Production • Skills Development	Cultural industries project with job creation and regional production potential.
Logistics Infrastructure • Trade Facilitation • Urban Mobility	Strong logistics PPP that can improve port efficiency and reduce congestion around Greater Abidjan.
Logistics Infrastructure • Regional Connectivity • Private Sector Development	Well-positioned inland logistics platform with strong potential to serve northern Côte d'Ivoire and Sahel corridors.
Maritime Transport • Urban Mobility • Tourism and Trade	Large-scale mobility initiative with strategic value, but bankability will depend on demand and operating model.
Maritime Sovereignty • Trade Logistics • Skills Development	Strategic maritime-capacity project with moderate size and clear private-operator relevance.
Urban Mobility • Environmental Restoration • Climate Resilience	High-impact lagoon regeneration programme with mobility, environmental and urban-development benefits.
Innovative Logistics • Regional Connectivity • Technology Transfer	Innovative but higher-risk logistics concept requiring careful demand, safety and regulatory validation.
Air Connectivity • Regional Infrastructure • Tourism and Trade	Clear regional infrastructure project with PPP potential if traffic and revenue assumptions are realistic.
Air Logistics • Regional Connectivity • Trade Facilitation	Strategic air-logistics project that should be tested against cargo volumes and anchor users.
Port Infrastructure • Mining Value Chains • Export Competitiveness	Very large port PPP with strong export logic, subject to mining pipeline and offtake commitments.
Port Infrastructure • Trade Facilitation • Private Sector Development	Commercial port investment with clearer PPP potential if traffic forecasts and concession terms are well structured.
Urban Logistics • Modal Shift • Environmental Efficiency	Practical logistics PPP with potential to reduce truck traffic and improve last-mile port distribution.

Rail Infrastructure • Regional Connectivity • Economic Corridors	Transformational but complex mega-project requiring strong traffic, affordability and fiscal-risk analysis.
Rail Infrastructure • Regional Integration • Export Logistics	Strategic corridor investment with strong integration value, but requiring phased structuring and anchor freight volumes.
Rail Infrastructure • Regional Integration • Trade Facilitation	Focused cross-border rail project with strong regional logic and more manageable scale than larger rail corridors.
Rail Rehabilitation • Regional Integration • Trade Logistics	High-priority regional rail rehabilitation with clear trade benefits and potential multilateral financing interest.
Urban Mobility • Climate Efficiency • Strategic Infrastructure	Advanced implementation project with high visibility and strong urban mobility benefits.
Urban Transport • Regional Connectivity • Passenger Services	Manageable PPP opportunity supporting Bouaké's role as a regional transport hub.
Urban Transport • Regional Connectivity • Passenger Services	Large urban transport PPP with strong service need but requiring careful terminal revenue structuring.
Public Buildings • Urban Renewal • Institutional Efficiency	Targeted rehabilitation project with clear fiscal-efficiency rationale and manageable PPP scale.
Public Administration Infrastructure • Asset Rehabilitation • Fiscal Efficiency	Practical asset-rehabilitation project that can reduce recurrent rental costs and improve administrative working conditions.
Public Administration Infrastructure • Safety Compliance • Asset Rehabilitation	Important public-building modernisation project with clear safety benefits and potential for structured PPP delivery.
Industrial Development • Housing Value Chain • Private Sector Development	Large industrial platform with strong import-substitution potential and direct links to the housing agenda.
Affordable Housing • Urban Development • Private Sector Development	High-impact housing programme with strong social relevance but substantial execution and affordability risks.
Public Administration Infrastructure • Fiscal Efficiency • Urban Renewal	Major government real-estate PPP that could rationalise public offices but requires careful affordability structuring.

Territorial Development • Public Administration Infrastructure • Urban Development	Transformational national programme with very high strategic importance and significant financing and sequencing challenges.
Urban Development • Climate Resilience • Smart Infrastructure	Very large urban-development initiative with major land, infrastructure, financing and implementation complexity.
Industrial Development • Private Sector Development • Value Chain Transformation	Strong PPP opportunity if land servicing, anchor tenants and zone management arrangements are clearly structured.
Industrial Development • SME Growth • Private Sector Development	Useful SME-focused industrial platform with good potential for phased private participation.
Industrial Development • Trade Logistics • Value Chain Transformation	Strategic industrial-zone PPP linked to port activity, export processing and regional value chains.
Industrial Development • Territorial Development • Private Sector Development	Large industrial platform with strategic location benefits, requiring strong demand validation and phased delivery.
Industrial Development • Agro-Processing • Private Sector Development	Good PPP candidate if integrated with logistics access, utilities and clear investor targeting.
Industrial Development • Regional Economic Hubs • Private Sector Development	Important regional industrialisation project with potential to crowd in SMEs and domestic manufacturers.
Industrial Development • Trade Facilitation • Private Sector Development	Potentially transformative industrial PPP, subject to land, environmental and logistics structuring.
Energy Transition • Renewable Energy • Grid Resilience	Strong renewable-energy PPP with clear climate benefits and private capital mobilisation potential.
Energy Transition • Renewable Energy • Grid Resilience	Advanced renewable-energy project with strong bankability potential once tariff and storage arrangements are confirmed.
Critical Minerals • Industrial Development • Private Sector Development	Strategic minerals project with high upside, but requiring careful resource, ESG and sponsor due diligence.
Energy Storage • Grid Stability • Energy Transition	Good PPP candidate once the revenue model and grid-service payment framework are clarified.

Energy Storage • Grid Stability • Energy Transition	Good PPP candidate once the revenue model and grid-service payment framework are clarified.
Energy Storage • Grid Stability • Energy Transition	Good PPP candidate once the revenue model and grid-service payment framework are clarified.
Energy Storage • Grid Stability • Energy Transition	Good PPP candidate once the revenue model and grid-service payment framework are clarified.
Energy Storage • Grid Stability • Energy Transition	Good PPP candidate once the revenue model and grid-service payment framework are clarified.
Energy Storage • Grid Stability • Energy Transition	Good PPP candidate once the revenue model and grid-service payment framework are clarified.
Energy Transition • Renewable Energy • Energy Storage	Climate-aligned PPP with strong system benefits if PPA and storage-service terms are well structured.
Energy Transition • Renewable Energy • Energy Storage	Strong climate-aligned PPP if tariff, storage and grid-integration arrangements are clearly structured.
Energy Transition • Renewable Energy • Regional Access	Bankable renewable-energy opportunity subject to PPA strength, grid connection and storage economics.
Energy Transition • Renewable Energy • Energy Storage	High-impact solar-plus-storage PPP with strong system value and clear private-sector participation potential.
Energy Transition • Renewable Energy • Grid Stability	Strong renewable-energy investment with good storage value if grid dispatch and payment terms are robust.
Energy Security • Renewable Energy • Strategic Infrastructure	Large renewable infrastructure project with strong development impact but requiring careful hydrology and construction-risk management.
Energy Security • Strategic Infrastructure • Industrial Competitiveness	Strategic dispatchable-power project with strong security-of-supply value, subject to gas supply and emissions considerations.

Energy Security • Logistics Infrastructure • Regional Supply	Targeted logistics investment with clear supply-security benefits and potential commercial storage revenues.
Energy Security • Port Logistics • Strategic Infrastructure	Important import-logistics project with strong operational benefits if demand and tariff assumptions are validated.
Energy Security • Industrial Competitiveness • Regional Development	Transformational corridor project with strong industrial impact, but requiring firm offtake and gas-supply arrangements.
Energy Security • Logistics Infrastructure • Regional Development	Major strategic logistics project with high economic value, subject to demand, right-of-way and tariff structure.
Energy Security • Gas Infrastructure • Industrial Competitiveness	Strategic gas-security project with strong system value if LNG procurement and offtake are bankable.
Energy Security • Clean Cooking • Strategic Storage	Strong energy-access and environmental project with clear storage revenue and public-policy benefits.
Industrial Competitiveness • Energy Security • Refining Capacity	Commercially relevant refinery upgrade with strong import-substitution value if SIR's financial structure is robust.
Critical Minerals • Industrial Value Chains • Regional Development	Flagship mining-industrial corridor with major transformational potential and correspondingly high execution complexity.
Tourism Development • Private Sector Development • Job Creation	Large-scale tourism PPP with transformational potential, but requiring phased delivery and strong commercial structuring.
Coastal Tourism • Leisure Infrastructure • Local Economic Development	Practical coastal tourism PPP with visible impact, moderate cost and near-term implementation potential.
Eco-Tourism • Coastal Development • Regional Inclusion	Nature-based tourism opportunity with strong regional impact if environmental and land risks are managed.
Leisure Infrastructure • Tourism Development • Private Sector Development	Commercially oriented leisure PPP with good demand potential, requiring an experienced operator and phased delivery.

Sustainable Tourism • Hospitality Infrastructure • Green Growth	Scalable hospitality programme suited to private hotel investors, with sustainability appeal and broad regional benefits.
Coastal Tourism • Destination Development • Job Creation	Major coastal tourism platform with strong destination value, but requiring careful phasing and bankable site packages.
SME Formalisation • Skills Development • Automotive Services	Practical cluster with execution momentum, supporting formalisation and productivity in automotive services.
Trade Facilitation • Regional Integration • Logistics Infrastructure	Strong trade facilitation PPP with clear regional integration benefits and measurable loss-reduction impact.
Creative Industries • Youth Employment • Territorial Inclusion	High-impact cultural infrastructure programme supporting regional access, jobs and creative economy development.

Food Security • Rural Resilience • Livestock Value Chains	Strong development impact, but delivery will require coordinated public support, private operators and concessional finance.
Food Security • Livestock Productivity • Private Sector Development	Important livestock programme with clear food-security benefits and good scope for private value-chain participation.
Food Security • Dairy and Meat Value Chains • Rural Transformation	Strategic rural transformation programme with strong import-substitution logic and significant execution coordination requirements.
Circular Economy • Waste-to-Energy • Environmental Restoration	Large circular-economy investment with environmental and energy benefits, but bankability depends on technology and offtake structure.
Horticulture Exports • Agribusiness • Private Investment	Export-oriented agribusiness opportunity with strong private-sector logic, subject to land, logistics and market validation.

Food Security • Agro-Industry • Import Substitution	High-impact food-security project with strong import-substitution value and sizeable operational execution requirements.
Petrochemicals • Energy Security • Industrial Competitiveness	Very large industrial project with strategic fertilizer and energy value, requiring robust gas supply, sponsor and offtake due diligence.
Circular Economy • Textile Industry • Export Manufacturing	Circular textile project with export potential, dependent on collection systems, processing technology and market access.
Bio-Industry • Sustainable Textiles • Green Manufacturing	Niche green manufacturing project with modest size and potential SME and artisanal textile linkages.
Agro-Industry • Circular Economy • Forestry Value Addition	Practical value-addition project with positive farmer-income and circular-economy benefits.
Circular Economy • Agro-Processing • Green Manufacturing	Promising circular agro-industrial project with forest-conservation benefits and potential green-finance relevance.
Health Logistics • Pharmaceutical Supply Chains • Trade Logistics	Strategic health logistics platform with private distribution potential and regional supply-chain relevance.
Industrial Development • Private Investment • Logistics Platform	Transformational private industrial park, but scale and land-servicing requirements create significant implementation and financing complexity.
Digital Infrastructure • Data Sovereignty • Private Investment	Strategic digital infrastructure project with potential anchor-client value and regional data-centre positioning.
Cold Chain Logistics • Trade Facilitation • Agribusiness Exports	Strong logistics and export platform if cold-chain demand, airport infrastructure and operator model are validated.
Agricultural Mechanisation • Industrial Development • Technology Transfer	Industrial mechanisation project with clear agricultural productivity benefits and technology-transfer potential.
